In taking the opinion of the Regiments and Staff Officers of His Majesty's Forces in India a very general wish has been expressed that all Widows should have their passage to England, &c &c. derrayed. The Funds will not now, admit of it but should the positive stancing balance of the Fund ever amount to Forty thousand Rubers (40,600), the Committee will again put the question for the sense of the Subscribers with a provision that such charge should again cease on the balance falling to thirty thousand Rubers (30,000): and as in that event all married Officers will have a claim on the Fund their subscriptions should then be augmented. As an Officer ceases to be a Subscriber on leaving India, all claims on the Fund must in like manner cease from the same period: but an Officer going to sea for the benefit of his health being entitled to his Company's allowances will be considered as a Subscriber during his absence.

A subaltern officer, or military assistant surgeon, having served six years in India is permitted to retire on the half pay of Ensign, if his constitution should be

so impaired as to prevent the possibility of his continuing in India.

Every officer returning on turlough, and wishing to retire from the service, must make a declaration to that effect, within twelve months after his arrival in Rayland; and in case of his neglecting so to do he must at the expiration of his furlough, either return to India, or be held to have reunquished the service, and not be entitled to retire on pay, unless he has continued to serve in India, from his first arrival for the space of twenty two years without having a forlough; in that case he is allowed two years before he shall be called upon to signify his intention of returing, but he can only be allowed the pay of the rank he held at the expiration of twelve months from his arrival in Europe

Officers in tuture retiring from the Service, shall be considered to have retired from the date of their application to that effect, or from the expiration of two years from the date of their landing in the United Kingdom, whichever shall first happen; and all Casualties by Death in Europe after the expiration of the same period of 2 years from the date of landing, shall be considered to have occurred from the date when that period expired, notwithstanding in both cases the Officers may have received an extension of Furlough, G. 13th. In order to avoid misconception as to the responsibility of Government for the safety of Ships and Vessels making use of the Hon'ble Company's Chain Moorings, the Governor General in Council has been pleased to direct, that it be explicitly notified to the Public, that Government does not guarantee the safety of any Ship or Vessel, which may use those Mourings.

STRAITS OF SINGAPORE.

FORT WILLIAM, DECEMBER 27, 1822.

The Most Noble the Governor General in Council in pleased to direct, that the following Conv of a Notification received from the Government of Prince of Wales Island, be published for general information.

PUBLIC NOTIFICATION

The Honorable the Governor in Council is pleased to direct, that the following instructions for passing through the North East Entrance into the Straits of Singapore, from the Straits of Dryon, by a Rout newly discovered by the Commander and Officers of the Honorable Comuny's Cruizer Prince of Wales, called " Phillip's Channel" be published for general information.

Directions for passing through the North East Entranceinto the straits of Singapore (from the Straits of Dryon,) or Phillip's Channel.

After clearing " the Middleburgh Shoal," either to the Eastward, or Westward a direct course may be steered for Cap I-land, which lays near a Bluff Head Land on the Eastern shore. This Island bears, North East by North from the centre of the Middleburgh, Shoal and North North East & East from the centre of Red Island; on the bearing there is an extensive Rect of Rocks, distant one mile to the North West of the Twins, with a working wind and standing to the Northward, a Vessel ought not to approach too near it; this shoat of Coral Rocks, is dry at low water, spring tides; when on it, the North passage Island hore South, Sahon Hill West, the Island of Red Island, South and by West, the soundings are from ten to seventeen fathoms round it, strep too After leaving Red Island, Pulo Doncan is the first Island that will be distinguished from the groupe of Islands forming the Eastern shote. Puto Doncan are two low woody Islands bearing North East ; North distant eight miles from Red Island; in passing is to the Westward, it ought not to be approached aparer than one mile, as there are some Rocky Reefs, which sorround it; from hence cap Island will be seen, and nears North distant four miles and a hart from Pulo Doncan, the soundings are from twelve to seventeen fathoms. cap I-land or Rock so named from its appearance, is a Rock of perpendicular sides, flat ut the top, and about forty feet in height and surrounded by a Reef of Rocks projecting out about three hundred yard., the soundings near it are from ten to fourteen fathoms, decreasing as you near the Island Detween it and the " Bluff Head Land," is a Reef of Rocks on which account it would not be advisable to go to the Eastward of Cap Island.

When aurenst of Cap Island, Long and Round Island, and the Rabbit and Coney may be distinctly seen, a direct course may be a cered to pass in Mid channel, between Round Island and Eastern Shore, which is three and a half miles across, the soundings are from seventeen to twenty-two fathoms. Long and Round Islands ought not to be approached nearer than three quarters of a mile, as three are Rocky Reefs round them. In working and standing to the Wes ward of the South end of Round Island go no further to the Westward, than to bring the North to the West end of Long Island, or with the centre of the Rabbit, at there are four Rocky Reefs to the South West of Red Island; when on the South East end of the Southern Reef in a boar, Red Island was in one, with the Rab-bit, the centre of Round Island East & South, the Soundings are irregular near

these Shoals and Long and Round Islands.

After passing Long and Round Islands, Singapore can be distinctly seen and a course ought to be steered for St. John's to clear the Bullalo Rock and a putch of dry Rocks to the South West of the Bullalo.

AMHERST HARBOUR.

The following Remarks by Captain Studdart, Commander of His Majesty's Ship Champion, on the approach from Sea to the New Town of Am-MERST, at the entrance of Martaban River, are published for General Information.

BY When Soundings are given, they are to be understood as having been taken at Low Water spring Tider.

" Streeting for AMHERST, with a leading wind, bring Cape Champion. (a small is and assuming the appearance of a Cape, when well in with

Zeabo,) to bear S E. & S and Zeabo, (a small well wooded Island, about one mile S. b. W. 4 W. from the Pagoda,) E. b. S .- Pagoda E. N. E. and East end of Beboo Island, N. & E. when Shirs without a Pilor, or unacquainted with the place, may Anchor in 6% tathoms, soft bottom, being in The fair way for Brisbane Passage, and as the pass is narrow, not exceeding twenty-five fathoms from rock to rock, with shallow knowls on either side, it would be advisable previous to its being buoved, to sound through into the harbour. But should circumstances prevent that precaution, the following burried remarks might conduct a ship through."

" Bring the centre of Zeabo E. S. E. about three Cables distant, and Cape Champion shut in by West point of Zeabo, then steel N. N. E. paying close attention to the Soundings, the depths varying in the Channel from three to nike fathoms, and in some places (by yawing a Cable's length on either side) fuom five feet to six fathoms, more particularly when Cape Champion opens about a sail's breadth to the Eastward of Zeabo .- The Beacon (to be) on the Western extremity of the tocks forming the East side of the pass, will lead to near its contre, when borrowing a little to the Eastward of Mid Channel, run through in six and eight fathoms general Soundings, steering for the first reach in the neighbourhood or Martaban River, N. N. E 3 E. When to the Northward of the Reef, the water may be shouled to four fathoms, then steel to the Eastward far the Southein point of the entiance to the Kalyeen River, or for a Conical Mount, shewing a little to the Southward of the entrance, being one of the long range of the Yea Mountains, seen in the interior, and anchor in from two and a half to three and a half soft bottom, at any convenient distant from shore-Larger vessels, when in four fathoms, to haul in for the auchorage, should steer for a large well wooded hill on the Northern end of the Waagrew, or Campbell Range, and anchor in from three to five fathoms sott bottom. I would recommend mooring up and down the Tide, and during the S. W. Monsoon, the best bower to the Eastward. To run our through Brisbane Passage, steer towards (what I imagine to be a shoal, with a passage round it) though Middle ground, guided in the approach by the soundings, until the pass is opened, and when Zeabo shews to the Westward of the Pagoda, with five and six tathoms halftide, it indicates the fair way, when Cape Champion and Pagoda are in one, had up a little more for the pass and when open then borrow (as on entering) a little to the Eastward of Mid-Channel, and run through S. S. W. & W. When a Cab'e and a half to the Southward, keep a point to the Westward until Cape Champion opens West of Zeabo, from whence I had regular soundings, with middy bottom."

"There is another Channel running close along the N. E. side of the reef with deep water, but running so near the rocks at the S. W. end of the Middle ground shoal, that I would not recommend its being used, except from necessity,"

NOTE. " This harbour possesses, among other advantages, that of filling nearly two hours before the waters cease to flow in the River, and continues, with little variation, in depth, until the Ebb becomes general, offering the facility of a lake during that interval, to communicate with the Shipping, &c. &c."

"A like advantage is enjoyed by L'Hävre de Grace, arising from similar natural causes, being situated near the Mouth of the Seine, its Area is filled at nearly flood from the British Channel, and remains station. ary nearly three hours. The Seine, and its tributary interior branches, receiving their quota in the interim, the returning Ebb is guided by the Sands at the Mouth of the River, tushes towards the harbour, where there not being any backwater, confines what is already in, until a fall at some feet has taken place in the offine, proving a circumstance of peculiar importance to so confined a port as L'Havre, and which may tend materially to the future benefit of the place now in question."

"The Velocity of the Flood Tide, at its utmost rate, is of no moment, the Ebb retiring with about double the force, in consequence of the Water from the Kalyen River being directed through the harbour after first quarter flood by the Diana Shoat, The extreme fitness of the harbour for Docks, (there being a rise and fail of nineteen feet,) although Undertakings to be reserved for other periods, should not be overlooked in the present view of its Qualities."

J. TROTTER, Secretary.

Buoy, of the Floating Light Vessel, &c. are published for general Information.

The Master of the Floating Light Vessel has been directed, on no account, to quit the Position herein described, unless driven from his Moorings, or when obliged to come to Town to re-fit; on which occasions a Pilot Vessel will be directed to take up the Position, until the return of the Light Vessel.

Extract from Report of Marine Surveyor General.

"It has been said that the Extremities of the Sands, at the Entrance of this River, have a tendency to increase to the Southward By the direction of the Marine Board, I examined the Eastern Reef and Sangor Sand, and found the end of the former in 20° 59' 36" North Latitude, and in 38° 12' 8" East Longitude; the end of the latter is in 21° 2'9" North, and 88° 20' 57" East, being on the Meridian of Fort William Flagstaff. The Lower Floating Light Buoy is in 21° 7' 00" North Latitude, and 88° 12' 40' East Longitude. From it the South end of the Reef bears S. ½ W. distaut 7½ miles, and the end of Sangor Sand E. S. E. ½ S. 9½ miles.

"By referring the Captain Maxield's Chart of the Sand Heads, it will be seen that my observations place the end of the Reef 1'26", and the end of Saugor Sand 2'9' more Northerly than is marked thereon. The Floating Light Station, I also make 4 Miles to the Northward of the situation assigned it on the Chart. In regard to the Longitude, I differ considerably from

the Chart.

"My observations place the end of the Eastern Reef 9' 22", and the end of Saugor Sand 15' 30' more Westerly; which difference partly arises from the Meridian of Fort Wilham being erroneously said to be 88° 28' East of Greenwich; whereas, observations taken at the Observatory, and many Lunars reduced to the Flagstaff, give it 88° 20' 57" East.

"The small difference in our Latitude is not likely to produce much inconvenience to Navigation; but the great difference in the Longitude may perplex the Navigation considerably; for if by departing from Madras, or any other well-determined Meridian, with good Chronometers, he is in possession of the correct Longitude, and shapes his course for the Floating Light, according to the Chart in 98° 25' East he will assuredly find himself 121 Miles to the Eastward of its true position, and be steering to Lacam's Channel.

"The present position of the Floating Light is well chosen, as she serves both to mark the Eastern Channel, and also for deep Ships to cross over the Eastern Reef by her bearings. I beg leave to suggest that she should not be removed, or suffered to quit her station and Cruize about, being (in her proper station) a well-determined object by which the Navigator may examine his Chronometers after a long passage down the River, as well as to depart from.

"The Reef Buoy at present bears about N. W. b. W. ½ Wt from the Floating Light, distant about 5 Miles, one Buoy being distinctly visible from the other.

 "The differences of Longitude were measured by four excellent Chronomiters, under favorable circumstances, three times between Fort William Flagstaff and Kedgeres Post Office, and five times between the latter and the Floating Light Buoy. The Latitudes are the result of several observations, saken at a shor distance on each side of Noon, and reduced the eto, by Doctor Young's method... I therefore hope, that the positions, which I have given to the different point's will be found correct, as every care was observed to obtain the same."

NOTIFICATION.

Notice is hereby given, that two Buovs have lately been laid down at the Entrance of Chittagong River, the particulars whereof, as reported by Mr. Branch Pilot Succlair, are published for general information; viz "One off Patanga Point, and the other on the Western extreme of the Flat running off Noman's or Norman's Point; the Northern Buoy is a Skeleton Buoy painted red, and an excellent mark to keep Vessels from running on Shore on the Reef off Patanga Point, either in working down or coming in. This Buoy ought not to be brought to the Eastward of N. by E.; it lays in two fathoms, low Water Spring Tides, and very steep, particularly to the N. W. I myself after laying the Buoy, shoated from two fathoms into 4 feet at one cast. The South Buoy is a 3rd Class Buoy, (Spire) painted black No. 15 This Buoy is an excellent leading Buoy into the River, and equally as good a mark for going out in the South West Monsoon, on a Flood Tide, running up Vessels may keep in close to Noman's Point from 4 to 3 fathoms; and by so doing run up in a line to the Buoy, without having less Water until you come close to the Buoy; on coming up close to the Buoy, I would advise the Officer in Charge to steer dicoming up close to the Buoy, I would advise the Once in Charge to seek the rect for the Northern Buoy until rather more than half-way between them, and then haul up N. E. for the Flag Staff. In crossing the Bar the best Water over is with the Black or Southern Buoy bearing N. E. to N. E. by N., carrying two fathous low water. These Buoys I call the Northern and Southern Buoys, being marks for the entrance of Chittagong River. In the dry season, I have no doubt of the Sands shifting, and of their becoming more extensive, so that it will most probably require sailing directions for the N. E. Monsoon, as well for the S. W. I am in great hopes that the Buovs will ride well in the situation they are now placed, the Northern one being entirely within the Current of the River, and the Southern one in the weakest part of the Strong Current running outside, being placed as far in the Entrance of the River as could be prudently done."

BENGAL DIRECTORY.

Part VIII.

A

LIST

OF THE

BRITISH & FOREIGN

Knhabitants of Calcutta

AND THE

UPPER PROVINCES.

O F

BENGAL AND ITS DEPENDANCIES,

(NOT INCLUDED IN OTHER LISTS OF THIS WORK.)

WITH THEIR RESIDENCE, OCCUPATION, &C. AS FAR AS ASCERTAINABLE.

The generally acknowledged want of a full and correct List of British Inhabitants has been so much felt and so often complained of that the Compilers of this Work have taken very considerable pains to make the List now offered to the Public as complete as circumstances will permit. They are fully sensible, however, that some errors may still exist and they therefore solicit all who feel an interest in its accuracy, and who may be able to give any additions or corrections, to favor the Publishers with communications on the subject.

As the whole List is kept standing in Type and is published twice a Year, they hope, in time, if the assistance they solicit be accorded, to make it as perfect as such a List can be expected to be.
